Think before You Buy

Altay is committed to making our world a better place to live.

100% Pollution Free

- **Altay is the first supplier of educational equipment to be ISO 14001:2004 certified.**
- The ISO standard assesses the management of all environmental aspects of our business activities including environmental protection and the socio-economic needs of our constituents.
- In Italy, Altay's headquarters and **production facilities have been 100% converted to solar power.**
- Altay's catalogues and **packing materials** are produced from **recycled paper.**
- Altay's products are produced with **non-toxic materials and are fully compliant with all international and EU safety regulations.**
- Altay has been awarded the **WorldDidac Quality Chart**, a quality certification that goes beyond existing ISO standards and provides the assurance that a company has the capacity to deliver products and services that contribute to a quality education for our children and sustainable growth for our planet.
- **Altay's corporate commitment to the environment attracts and motivates employees dedicated to delivering the best goods and services to our customers worldwide.**

About Altay

Started as a family business more than 60 years ago, Altay has grown into a 21st century, international company with operations on 5 continents employing more than 500 people.

But, family traditions and values are still the basis of our work.

We are ready to meet today's market demands with the passion and dedication of the past, together with the technology and tools of tomorrow.

Altay Vision

Altay Scientific is a leading company in the global market for science education sold through a worldwide network of authorized dealer partners.

Altay produces a full line of innovative and user friendly products based upon the highest technology research and development married to high quality, low cost production techniques and processes.

The Altay brand stands for innovation, value and customer orientation. The global Altay organization remains committed to investing the necessary human and financial capital in the Altay Vision.

Altay Mission

The search for knowledge is a need that comes from human nature. To satisfy this need is to overcome the social, economic and intellectual differences that can only divide us.

Our mission is to develop and market innovative, user friendly and affordable products, "Instruments of Knowledge," to allow and facilitate this search for knowledge.

Altay will continue to support technology development, continually improving goods and services maximizing a humanistic vision of society and progress.

In pursuing our corporate goals, we will adhere to the most rigorous professional ethics regarding every aspect of our business.

We will be part of and "give back" to all of the communities where we do business.

Our R&D Biology Department

Thanks to our highly qualified staff who works in our R&D Biology Dept., Altay has become a leader in developing and crafting biology teaching equipment that is anatomically accurate, durable and user-friendly.

Our dedicated, creative team of experts strives to develop a range of new products that facilitate teaching and motivate learners by bringing science to life!

Luigi Altomare, PhD

Head of Altay's Biology R&D Dept.

Dear Customer,

Altay operates under one simple notion: to create high-quality teaching products that are affordable. Research into modern teaching methods and their practical applications in classrooms have helped us to develop our product line. To do that, we've spent a lot of time in schools teaching, watching and learning.

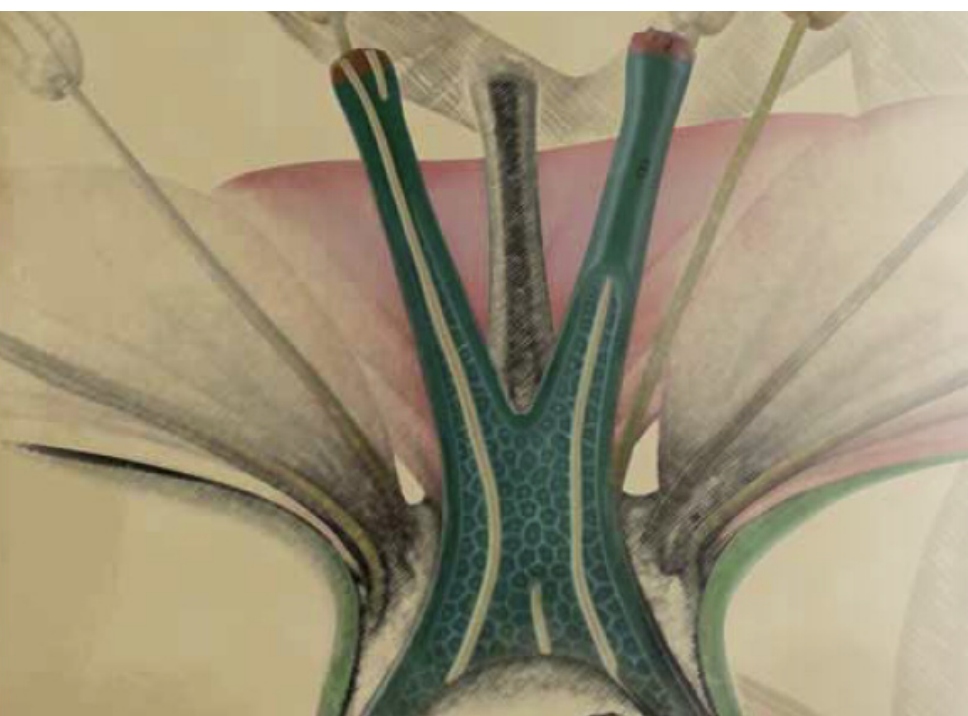

We truly believe that effective learning comes from direct experiences. Altay is engaged in designing and developing a full range of products that will both motivate students and help teachers to convey theory in a stimulating and exciting way.

In other words, Altay's products are CRAFTED FOR YOUR WORLD, crafted just for you!

PRODUCTS HIGHLIGHT

84 FROG

This 3X life size model provides a highly accurate illustration of the morphology of a frog.

84 HEN

This 8-part life-size model describes in great detail the anatomy of a hen.

36 STRUCTURE OF ARTERY AND VEIN

An important support for understanding the difference between artery and vein histology.

05 MUSCULAR TORSO NATURELLE

Life size, it is composed of 28 parts and all body systems are represented and easily accessible.

We reserve the right to change specifications, product description, product quality and application at any time without prior notice. We assume no liability for errors in regards to specifications, part numbers or model application.

15 HUMAN TORSO CD-ROM GUIDE

This CD-ROM Guide greatly extends the educational value of the Altay anatomical torsos

23 DISC HEAD

This life-size head model is sliced horizontally into 12 pieces, giving an idea of how computer tomography works

37 INTRODUCTORY CORONARY BYPASS

This model provides a detailed illustration of the anatomy of the human heart with three coronary bypasses.

With Altay's models you can observe even the smallest detail of the human anatomy. Our detailed and realistic reproduction of the human organs and systems will prove to be a key tool for your biology classes.

Our cooperation with prestigious International Institutions and the use of real specimens allows us to design and develop accurate and realistic models.

All aspects of the human anatomy will be easier to understand and will fulfill perfectly all your teaching and learning needs, from primary education to university level.

Altay Biology models are made of durable polyvinyl resin and hand painted by skilled craftsman with a safe non-toxic paint. This ensures durability and environmental friendly models with a very natural look and feel.

HUMAN ANATOMY MODELS

Torsos

MUSCULAR TORSO NATURELLE

6000.54

Life size, it is composed of 28 parts and all body systems are represented and easily accessible. The left side exposes all significant superficial and deep muscles with vessels and bones. The open back shows muscular layers as well as the vertebral column and associated nerve branches. A thoracic vertebra, including a section of spinal cord, is removable for close examination of its anatomical details.

The head is open and the brain is fully exposed on one side. The neck is dissected to expose muscular, neural, vascular and glandular structures. Significant features are numbered and referenced on the accompanying multilingual key card. The dissectible male and female urogenital systems are interchangeable.

NEW

Mounted on fine wood base.

Size: 89x41x23 cm

Weight: approx. 1050 g

Pris:
9.012,- kr.

Removable structures include the following:

- eye with optic nerve and extraocular muscles
- half of the brain, divided along the longitudinal fissure, showing internal structures and blood vessels
- trachea
- descending thoracic aorta and esophagus
- right and left lungs (2 parts each), showing the bronchial tree and vasculature
- chest and abdominal cover, showing superficial musculature
- mammary gland
- liver with gallbladder
- half of one kidney sectioned along the frontal plane, showing the internal structure and vessels
- 2-part heart with clear representation of atria, ventricles, valves and section of heart wall
- stomach dissected in 2 parts
- pancreas, duodenum and spleen with vessels and ducts
- small and large intestines with removable cover over portion of caecum
- male urogenital systems (4 parts)
- female urogenital system (3 parts) including embryo
- thoracic vertebra (T12) with spinal cord

HUMAN ANATOMY MODELS

Torsos

BUDGET SEXLESS TORSO, 12 PARTS

6000.61

This sexless life-size torso is composed of 12 parts. Accurate in all of its detailing, this model is a useful tool to show the human anatomy in any classroom. Structures are numbered and identified on the accompanying k-card. The head is removable and divided into two parts, exposing the inner structure of the brain. The neck is dissected through the ventral surface to show muscular, glandular, vascular and neural structures. The thorax and abdomen are completely open, affording an unrestricted view of the internal organs and structures.

Removable components include the following:

- Head, divided into 2 parts, showing a section of the brain and the upper respiratory tract
- Half of the brain, divided along the longitudinal fissure to expose internal structures and vessels
- Right and left lungs, showing the bronchial tree and vasculature
- Heart
- Liver with gallbladder
- Stomach
- Pancreas, duodenum and spleen with vessels and ducts
- Small and large intestine with removable window in caecal region

Torsos

TORSO SEXLESS, 16 PARTS

6000.51

This life size sexless torso, composed of 16 parts, is appropriate for any human anatomy course. All of the major organ systems are represented with great attention to accuracy and detail. Structures are numbered and identified on the accompanying key and many additional features are included in the CD-ROM Guide. The head is open, exposing one half of the brain. The neck is dissected ventrally to expose muscular, neural, vascular and glandular structures. The thorax and abdomen are completely open, affording an unrestricted view of the internal organs and structures.

Removable structures include the following:

- half of the brain, divided along the longitudinal fissure, showing internal structures and blood vessels
- eye with optic nerve and extraocular muscles
- descending thoracic aorta and esophagus
- right and left lungs showing the bronchial tree and vasculature
- 2-part heart showing the atria, ventricles, cardiac valves and section through the ventricular heart wall
- half of one kidney, sectioned along the frontal plane to show the internal structure and vessels
- kidney, urethra and urinary bladder with prostate (removable in 2 parts)
- stomach, showing muscular and vascular structures
- pancreas, duodenum and spleen with vessels and ducts
- liver
- small and large intestine with removable cover over portion of caecum

Mounted on base.
Size: 89x41x23 cm
Weight: approx. 9235 g

Supplied with the

HUMAN ANATOMY MODELS

Torsos

TORSO DUAL-SEX, 25 PARTS

6000.00

This life size closed back torso is composed of 25 parts that feature the most realistic reproductions of anatomical structures in their most intimate detail. The head is sectioned to expose half the brain. In addition, the neck is dissected to expose muscular, neural, vascular and glandular structures. The thorax and abdomen are completely open, providing an unrestricted view of all internal features. Significant structures are numbered and referenced on the accompanying key. Many additional features are included in the CD-ROM Guide. Separate male and female urogenital systems fit interchangeably into the main portion of the torso.

Removable structures include the following:

- eye with optic nerve and extraocular muscles
- half of the brain, divided along the longitudinal fissure, showing internal structures and blood vessels
- trachea
- descending thoracic aorta and esophagus
- right and left lungs (2 parts each), showing the bronchial tree and vasculature
- liver with gallbladder
- half of one kidney sectioned along the frontal plane, showing the internal features and vessels
- 2-part heart with excellent depiction of atria, ventricles, valves and muscular heart wall
- stomach
- pancreas, duodenum and spleen with vessels and ducts
- small and large intestines with removable cover over portion of caecum
- male and female urogenital systems (4 parts each) sectioned medially with excellent views of internal structures

Mounted on base.

HUMAN TORSO CD-ROM GUIDE

6000.30

This CD-ROM Guide greatly extends the educational value of the Altay anatomical torsos by identifying hundreds of structures that are not included on the printed key.

Designed for ease of use, the guide is composed in PDF format and organized systematically for efficient navigation.

High-resolution digital images of torso components show the finest anatomical details of all body systems from various angles, enabling the user to make direct comparisons with standard anatomical atlases.

Structures are clearly numbered and referenced with standard anatomical nomenclature.

HUMAN ANATOMY MODELS

Anatomy of the Human Trunk

FEMALE PERINEUM

6000.14

This life size model shows the female perineal area, including the anus and the external genitalia. The pelvic diaphragm, urogenital perineum with opening of the vagina and the anal perineum are well represented. Distribution of blood vessels and nerve endings is included.

Mounted on board. Size: 33x23x10cm. Weight: approx. 1200 g

Pris:
498,- kr.

6000.14 ►

MALE PERINEUM

6000.15

This life size model shows the male perineal area, including the anus and external genitalia. The pelvic diaphragm, urogenital perineum and anal perineum are well represented, including distribution of blood vessels and nerve endings.

Mounted on board. Size: 33x23x10cm. Weight: approx. 1200 g

Pris:
498,- kr.

6000.15 ►

MEDIASTINUM, 6 PARTS

6000.45

Pris:
954,- kr.

This life size model is composed of 6 parts, including a 2-part heart that provides an anterior view of the chambers and valves. The sternum and thymus are removable to reveal the pericardial sac and the major pulmonary and systematic vessels. The trachea and esophagus are shown entering the mediastinum through the superior thoracic aperture; the inferior thoracic aperture is delimited from the diaphragm musculature.

Mounted on base.
Size: 40x26x31 cm
Weight: approx. 1930 g

FRONTAL AND MEDIAN SECTION OF HEAD (RELIEF MODEL)

Life size representation of the superficial and the internal structures of the head and neck. Comparison between frontal and median sections provides a superior understanding of the anatomical structures of the head and neck.

Mounted on board. Size: 53x38x6.5 cm - Weight: approx. 1600 g

6030.04

HALF HEAD LIFE SIZE

Life size model shows the right half of the human head and neck, sectioned along the sagittal plane. A superficial dissection exposes the facial muscles, the superficial blood vessels and nerve branches of the face and scalp, the parotid and submandibular glands. A median dissection exposes the brain with its internal structure, the pharynx and upper respiratory tract, a section of the cervical vertebrae.

Mounted on base. Size: 20x14x26 cm - Weight: approx. 1200 g

Pris:
735,- kr.

6030.04

Pris:
1.221,- kr.

HEAD DISSECTION, 4 PARTS

Life size head model is composed of 4 parts, as follows:

- half brain, features the internal structure of the cerebrum, including blood vessels
- half of the cerebellum
- eye with optic nerve

The right side of the face is dissected in sagittal and horizontal section, showing many significant internal features of the skull and brain, as well as the entire oronasal cavity.

Mounted on base. Size: 20x15x22 cm - Weight: approx. 1200 g

MEDIAN SECTION OF HEAD (RELIEF MODEL)

6030.01

Life size representation of the superficial and the internal structures of the head and neck. This relief model shows all relevant structures of the human head in great detail.

Mounted on board. Size: 33x23x5.5 cm - Weight: approx. 850 g

Pris:
414,- kr.

ARTERIES OF HEAD, NERVES OF HEAD, VEINS OF HEAD SET OF 3

6030.05

This set is composed of models 6030.07, 6030.08 and 6030.09

Pris:
766,- kr.

VEINS OF HEAD

6030.09

This model shows the pathway of the left internal jugular vein in the cervical and head region, including the tributary venous branches.

Mounted on base.
Size: 20x15x20 cm
Weight: approx. 600 g

▲ 6030.08

ARTERIES OF HEAD

6030.07

This model shows the pathway of the left external carotid artery, including collateral and terminal branches.

Mounted on base.
Size: 20x15x20 cm
Weight: approx. 600 g

NERVES OF HEAD

6030.08

This model shows the trigeminal nerve and its branches.

Mounted on base.
Size: 20x15x20 cm Weight: approx. 600 g

Pris:
342,- kr.

CRANIAL AND AUTONOMIC NERVES, 2 PARTS

6160.07

2.5X life size.
Dissection of human half head shows the 12 cranial nerves with collateral branches and autonomic nerves. Median section reveals the upper respiratory tract and pharynx. The eyeball is removable for close examination.

Mounted on base.
Size: 43x26x41.5 cm
Weight: approx. 2000 g

Pris:
1.578,- kr.

HUMAN ANATOMY MODELS

Head, Brain and Nervous System

DISC HEAD

6030.15

NEW

This life-size head model is sliced horizontally into 12 pieces, giving an idea of how computer tomography and magnetic resonance work. Each slice can be rotated and removed for closer examination of its anatomical detail, which is reproduced with great accuracy. All structures including muscles, nerves, brain gyri and sulci are numbered and identified on the accompanying multilingual k-card.

Mounted on base.
Size: 25x18x24
Weight: 3000 g

Pris:
2.546,- kr.

6030.15 ►

HEAD AND NECK MUSCULATURE

6030.10

This model shows the muscles of the head, neck and superior thoracic region. Superficial and deep musculature are well represented, as are the pathways of the subclavian and carotid arteries.

Mounted on base.
Size: 42x30x48 cm - Weight: approx. 3000 g

Pris:
1.086,- kr.

6030.10 ►

6030.11 ►

HEAD WITH PHARYNX MUSCLES

6030.11

This life size head model is dissected along the sagittal plane into 2 halves. Details of the oronasal cavity and larynx as well as musculature of the pharynx are exceptionally well represented.

Mounted on base with stand. Size: 16.5x15x29 cm - Weight: approx. 700 g

HUMAN ANATOMY MODELS

Head, Brain and Nervous System

REGIONAL BRAIN, 2 PARTS

Pris:
532,- kr.

6160.10

Life size brain with distinct color coding for the following regions: frontal lobe, parietal lobe, occipital lobe, temporal lobe, motor cortex, somatosensory cortex, limbic cortex, cerebellum, brain stem.

BRAIN WITH ARTERIES, 2 PARTS

6160.01

A life size brain model divided medially in 2 parts along the sagittal plane. It shows the left and right cerebrum, cerebellum, brain stem and blood vessels.

Includes cradle base.
Size: 20x16x15 cm -
Weight: approx. 600 g

Pris:
454,- kr.

BRAIN WITH ARTERIES, 9 PARTS

6160.14

This extremely realistic life size brain model can be divided into 9 parts showing the temporal and occipital lobes, the frontal and parietal lobes, the cerebellum, the brain stem and the basilar artery. All structures, including blood vessels, are shown in great detail.

THORACIC VERTEBRAE WITH SPINAL CORD

6160.03

2X life size. 2 thoracic vertebrae with rib ends and costovertebral articulations are included. The spinal cord is sectioned transversely, showing details of the grey and white matter, spinal nerve branches and the spinal ganglia. This model highlight the communication between sympathetic trunk and spinal column, through sympathetic ganglion and spinal ganglion, connected by white and grey communicating branches

Mounted on base with stand.
Size: 15x15x31 cm Weight:
approx. 320 g

Pris:
652,- kr.

Size: 20x17x15 cm
Weight: approx. 900 g

HUMAN ANATOMY MODELS

Head, Brain and Nervous System

BASAL NUCLEI AND INTERNAL CAPSULE

6160.16

A fundamental support to study the human deep neuroanatomy. Greatly enlarged, composed of 2 parts, it clearly shows - with the aid of false colours - the principal anatomical structures such as the caudate nucleus, the lentiform nucleus and the genu of the internal capsule. The main structures are numbered and refer to the accompanying k-card (included).

Size: 11x12x11 cm -
Weight: 170 g

Pris:
193,- kr.

6160.15

6160.16

BRAINSTEM, CEREBELLUM AND FOURTH VENTRICLE

6160.15

This life-size model can be divided into three parts: Cerebellum and Brainstem, longitudinally sectioned, showing the insertions of the cranial nerves and the inner anatomy. All the different structures are numbered and identified on the accompanying k-card.

Mounted on base.
Size: 18x12x13 cm -
Weight: 380 g

Pris:
266,- kr.

BRAINSTEM AND NUCLEI OF THE HYPOTHALAMUS

This 4-part model, 2X life-size, is a detailed representation of the human brainstem and hypothalamus. The brainstem is sectioned to show the hypothalamic nuclei; the thalamus is removable and divisible into two parts for inner examination. The insertions of the cranial nerves are easily recognizable on the surface of the brainstem.

Size: 21.5x13x13.5 cm
Weight: 420 g

Pris:
226,- kr.

DIENCEPHALON

6160.17

This 4-part model, 5X life-size, shows the human diencephalon: all the main parts of thalamus, epithalamus, metathalamus and hypothalamus are represented in great detail. The hypothalamic nuclei are displayed in different colours; the thalamus is removable and divisible into two parts to show the inner anatomy.

Pris:
504,- kr.

6160.27

6160.28

NERVOUS SYSTEM

6160.28

This ½ life-size relief model shows a general view of the peripheral and central human nervous system: the head is open to reveal the brain and cerebellum; the pathway of the main nerves is well illustrated in relation to the skeleton.

Mounted on board.
Size: 90x32x8,5 cm
Weight: 2300 g

BRAINSTEM, ENLARGED 3 TIMES

6160.23

An important support for understanding the deeper anatomy of the brain. This single-piece model, enlarged 3 times, displays all the neurological tracts, exiting cranial and peripheral nerves in fine detail. The principal anatomical structures are numbered and identified on the accompanying k-card.

Pris:
343,- kr.

6160.22

Size: 12x12x12 cm
Weight: 80 g

VENTRICLES AND BASAL NUCLEI

6160.22

This life-size model is an important tool to study the topography of the cerebral ventricles related to the basal nuclei. All the different structures are reproduced in great detail and identified on the accompanying k-card.

Pris:
126,- kr.

NEURON, 2 PARTS

6160.27

This item, magnified 2,500 times, displays the structure of a typical neuron. The sectioned soma shows all the internal cellular organs including nucleus, Golgi complex, smooth and rough endoplasmic reticulum. The dendrite can be opened into two parts to reveal the internal structures such as the Schwann cell and myelin sheath.

Mounted on board.
Size: 40x26x11.5 cm - Weight: 1100 g

Pris:
2.709,- kr.

HUMAN ANATOMY MODELS

Head, Brain and Nervous System

5TH CERVICAL VERTEBRA

6160.09

7X life size. This model shows in great detail the structure of the 5th cervical vertebra; a transverse section of the spinal cord with grey and white matter, the nerve branches, the spinal ganglion and the blood vessels.

Mounted on board.
Size: 40x26x9 cm -
Weight: approx. 710 g

Pris:
1.242,- kr.

◀ 6160.09

BRAIN PATHOLOGIES

6160.24

This life size model depicts 3 different pathologies that involve the vascular system of the brain, including arteriovenous malformations (called AVM), in which the blood vessels are tangled together rather than forming a normal circuit. Other featured conditions include a cerebral aneurysm and a cerebrovascular hemorrhage (stroke).

Mounted on base with stand.
Size: 11x11x20 cm - Weight: approx. 230 g

Pris:
313,- kr.

6160.24 ▶

CRANIAL LAYERS

6160.20

Enlarged several times. This model shows the stratification of the human cranium, revealing details of internal structures from the skin to the cerebral white matter.

Mounted on board.
Size: 40x26x13.5 cm -
Weight: approx. 1750 g

Pris:
622,- kr.

HUMAN ANATOMY MODELS

Sense Organs

EYE, 6 PARTS

6210.01

6X life size. The model can be dissected on the horizontal plane to show internal details. Cornea, iris, lens and vitreous body can be removed. Muscular attachments on the sclera and part of the choroid are also shown.

Mounted on base with stand.
Size: 17x15x27 cm - Weight: approx.

Pris:
513,- kr.

6210.01

TONGUE AND TONGUE TISSUE

6090.30

This item shows the anatomy of the life-size tongue, including the palatin and lingual tonsils, epiglottis and muscles. The model also includes a detailed 20X life-size enlargement of the tongue tissue to show its histology: taste buds, lingual and mucous glands, crypt and muscles are well represented.

6090.30

Pris:
499,- kr.

Mounted on base.
Size: 33x23x15 cm
Weight: 750 g

COCHLEA AND CORTI'S ORGAN

6220.11

This single-piece model is a useful tool to study the mechanism of sound reception. The model shows an enlarged section of the cochlea and Corti's organ including hair cells, tectorial and basilar membrane.

Mounted on board.
Size: 40x26x5 cm
Weight: 1250 g

Pris:
438,- kr.

6220.11

LABYRINTH, 2 PARTS

6220.04

Enlarged about 18 times. Composed of 2 parts. The superior semicircular canal and vestibule are open, showing the saccule and utricle.

Size: 33x21.5x14.5 cm
Weight: approx. 1200 g

Pris:
1.176,- kr.

6220.04

EAR OSSICLES

6220.03

This model represents the malleus, incus and stapes, enlarged about 20 times.

Size: approx.
21x14.5x31 cm
Weight: approx. 480 g

6220.03

Pris:
549,- kr.

HUMAN ANATOMY MODELS

Sense Organs

EAR DISEASES

6220.10

This 1.5X life size model shows the most common pathologies affecting the outer, middle and inner ear. At the level of the Eustachian tube you can see mucus and secretory otitis media; the cholesteatoma and eczema are also represented in high detail. On the additional relieves you can see a comparison of 3 different eardrums: the first one is healthy, the second one exhibits a perforation and the third one showing the bullous myringitis.

Pris:
395,- kr.

Mounted on base.
Size: 14x10.5x17 cm - Weight: 188 g

EAR, 3 PARTS

6220.08

3X life size. The model shows details of the external, middle and inner ear. The eardrum with malleus, incus and stapes are removable. The other removable part is composed of the cochlea and labyrinth with vestibular and cochlear nerves.

Mounted on base.
Size: 33x23x22.5 cm -
Weight: approx. 1000 g

Pris:
483,- kr.

◀ 6220.08

LARYNX, LIFE SIZE, 2 PARTS

6120.19

This life size model can be opened into 2 parts to show the anatomy of the human larynx and related structures: hyoid bone, cartilages, ligaments, muscles, vessels, nerves and thyroid gland.

Pris:
306,- kr.

LARYNX MODEL, 2 TIMES ENLARGED, 5 PARTS

6120.11

This 5-part model is sectioned longitudinally to reveal intimate details of internal structures, including the hyoid bone, cartilages, ligaments, muscles, vessels, nerves and thyroid gland.

Mounted on base with stand.
Size: 15x15x20.5 cm
Weight: approx. 380 g

Pris:
809,- kr.

PATHOLOGICAL MODEL OF THE BRONCHI

6120.13

This 10x life size, 1-part model, shows 2 pathologies of the bronchi (bronchitis and bronchiectasis), referring to an inflammation and an abnormal chronic dilatation of one or more of the bronchi, respectively.

Pris:
215,- kr.

Mounted on base with stand.
Size: 11x17x22 cm
Weight: approx. 120 g

◀ 6120.13

PATHOLOGICAL MODEL OF THE LUNG

6120.12

This 1-part, 2/3 life size model illustrates some of pathologies of the pulmonary system caused by microbial infections (lung abscess, pneumonia and tuberculosis). The surface of the model is black to show the visible effect of smoking. A cancerous tumor is also shown with excellent detail. All the pathologies are showed separately in the model with a realistic representation of their morphology.

Mounted on base with stand.
Size: 11x11x20 cm
Weight: 250 g

363,- kr.

◀ 6120.03 ▶
Mounted on base with stand.
Size: 11x13x20 cm
Weight: 220 g

NASAL CAVITY, 3 PARTS

6120.06

3X life size, the model shows a medial section of the nasal cavity. The nasal septum and part of the olfactory epithelium are removable to expose deep internal structures.

Mounted on base with stand. Size: 15x20x30 cm-
Weight: approx. 1000 g

Pris:
1.688,- kr.

6120.06 ▶

TRACHEA SECTION

6120.20

This item is composed of 3 different models on the same base: the first one reproduces a 3X life-size cross-section of the human trachea; it can be longitudinally divided into two parts to show the inner anatomy. The second model is an enlargement of the anterior trachea wall cross-section; it shows all the different layers, from the tracheal cartilage to the epithelium. The third one shows the magnified pseudostratified ciliated epithelium in great detail: it displays the typical ciliated cells and the mucous cells.

Pris:
540,- kr.

HUMAN ANATOMY MODELS

Heart and Circulatory System

HUMAN HEART, 2 PARTS

Life size in 2 parts. The anterior heart wall can be removed to show the left and right ventricles and atria as well as the tricuspid, pulmonary, mitral and aortic valves.

6070.02

Pris:
235,- kr.

ATHEROSCLEROSIS AND THROMBOSIS MODEL

Atherosclerosis is the most common acquired disease of arteries in developed countries. This pathology, characterized by thickening of the arterial walls with subsequent loss of elasticity, is associated with the buildup of plaque (mainly cholesterol) in the arterial lumen. This model, approximately 10X life size, shows the atheromatous plaque in various pathological stages along with local intravascular clotting (thrombosis) due to the arterial narrowing.

6070.10

Pris:
172,- kr.

Mounted on base with stand.
Size: 16.5x13x17 cm - Weight: approx. 110 g

Mounted on base with stand.
Size: 11x11x18 cm
Weight: approx. 230 g

HUMAN BLOOD CELLS

6070.04

Enlarged 2000 times, this model shows the various types of blood cells, including red blood cells; white blood cells (lymphocytes, monocytes, neutrophils, eosinophils and basophils) and blood platelets.

Mounted on board.
Size: 53x38x7.5 cm
Weight: approx. 1000 g

Pris:
878,- kr.

GIANT HEART, 4 PARTS

This 4-part model is 3X life size. It is sectioned along the anterior plane to show internal structures, including the cardiac valves and the comparative morphology of the right and left ventricles. The right atrium is also removable.

6070.05

6070.04

HUMAN ANATOMY MODELS

Heart and Circulatory System

HUMAN HEART WITH THYMUS

Pris:
300,- kr.

6070.16

This three-part natural size model shows the anatomy of the human heart associated with the thymus gland. The thymus and the anterior heart wall can be removed for closer examination of the inner heart structures such as the left and right atria and ventricles, valves and papillary muscles.

Mounted on base with stand. Size: 11x11x22 cm - Weight: 250 g

INTRODUCTORY CORONARY BYPASS

6070.15

This life-size two-part model provides an extremely detailed illustration of the anatomy of the human heart with three coronary bypasses. The anterior wall can be detached to expose the inner chamber and valves.

Pris:
422,- kr.

6070.15
Mounted on base with stand.
Size: 11x11x25 cm
Weight: 230 g

HUMAN HEART, 4 PARTS, 2X LIFE SIZE

6070.17

This 2X life size model describes all the main structures of the human heart in great detail. The right part is detachable, to expose the inner chambers and valves. The left auricle and ventricle wall can be removed to show the atrium, the mitral valve, the ventricle and papillary muscles.

Mounted on base with stand. Size: 11x11x17 cm - Weight: 590 g

Pris:
1.528,- kr.

HEART HYPERTROPHY

Pris:
211,- kr.

6070.11

This life size model shows the compensatory hypertrophy heart disease. This pathology is characterized by the myocardium thickening of the muscular fibres of the left ventricle. Hypertrophy heart disease is the complication of a chronic hypertension. The model is divided in 2 parts and mounted on base with stand.

HUMAN ANATOMY MODELS

Digestive System

HUMAN DIGESTIVE SYSTEM, 3 PARTS

6090.01

This life size model shows the human digestive tract from mouth cavity to rectum. The oral cavity, the pharynx and the first part of the esophagus are dissected along the medial sagittal plane. The liver is shown together with the gall bladder and the pancreas is dissected to expose internal features. The stomach is open along the frontal plane; the duodenum, caecum, part of the small intestine and the rectum are open to expose the interior. The transverse colon is removable. An additional relief model of the head shows the anatomy of the mouth with salivary glands.

Mounted on board. Size: 90x32x14 cm -

6090.01 ▶

Weight: approx. 2200 g

Pris:
1.463,- kr.

LIVER SECTION WITH GALLBLADDER

6090.16

The model, 1.5X life size, shows the liver and gallbladder in open section with the complex network of vessels and bile ducts, displayed in different colors for clarity and ease of examination.

Mounted on base with stand.
Size: 15x17x26 cm
Weight: approx. 750 g

Pris:
655,- kr.

◀ 6090.16

◀ 6090.19

PATHOLOGICAL MODEL OF THE LIVER

6090.19

This 1/3 life size model is divided into 2 parts; the following diseases are represented with great detail and realism:

- Viral hepatitis
- Liver abscess
- Fatty liver
- Cirrhosis
- Liver cancer
- Gallstones

Pris:
285,- kr.

All the pathologies are showed separately in the model with a realistic representation of their morphology.

Mounted on base with stand.
Size: 11x11x21 cm
Weight: approx. 165 g

Weight: 2000 g

STRUCTURE OF THE STOMACH WALL

6090.28

This one-piece model, 150X life size, is an important tool to study the histology of the most important organ of the digestive system: the stomach. All the different layers from the epithelium to the serous coat are represented with great accuracy and detail. The principal structures, including different cellular types, capillary and lymphatic vessels are numbered and identified on the accompanying k-card (included).

STOMACH, LIFE SIZE, 2 PARTS

6090.03

This life size model is dissected along the medial plane and can be opened to show the internal structure of the stomach, including the mucosa, the pylorus, a section of the gastric wall. The model also shows the superficial muscular layers and the blood vessels.

6090.03

Mounted on base with stand.
Size: 11x13x18 cm - Weight: approx. 230 g

STOMACH, 1.5X LIFE SIZE, 2 PARTS

6090.13

This model is dissected along the medial plane and can be opened to show the internal structure of the stomach, including the mucosa, the pylorus and a section of the gastric wall. Superficial dissections expose the longitudinal, circular and oblique muscle layers, with nerves and vascular structures.

Mounted on base with stand.
Size: 11x16x20 cm
Weight: approx. 680 g

6090.13

Pris:
631,- kr.

HUMAN ANATOMY MODELS

Digestive System

STOMACH AND ASSOCIATED ORGANS OF THE UPPER ABDOMEN, 6 PARTS

6090.20

This life size model has the following features, 2-part stomach along with the pancreas, spleen and duodenum (shown in open section), gallbladder with bile ducts, abdominal aorta, vena cava, mesenteric and iliac vessels. 2 sections of the liver-gallbladder are interchangeable.

Mounted on base with stand.
Size: 20x15x32 cm
Weight: approx. 900 g

Pris:
985,- kr.

◀ 6090.20

GASTRIC DISEASES

6090.24

This 1-piece life size model describes the most common pathologies of the stomach including ulcerated gastric cancer, pyloric stenosis, gastric ulcer, chronic atrophic gastritis, hiatal hernia, bleeding gastritis and carcinoma: all the pathologies are represented in high detail.

Mounted on base with stand
Size: 16.5x13x18 cm
Weight: 230 g

Pris:
226,- kr.

PATHOLOGICAL MODEL OF THE RECTUM

6090.18

This 1-piece model, approximately 5X life size, shows various pathologies of the rectum and anus. Common anorectal conditions, including hemorrhoids, anal fistulae and fissures and 2 types of abscesses are shown in great detail. The model also illustrates ulcerative colitis, polyps and rectal carcinoma.

Mounted on base with stand.
Size: 11x11x20.5 cm
Weight: approx. 200 g

Pris:
207,- kr.

6090.18 ▶

HUMAN ANATOMY MODELS

Digestive System

PATHOLOGICAL MODEL OF THE PANCREAS, DUODENUM AND GALLBLADDER

Pris:
235,- kr.

6090.23

This life size model is a representation of the most important diseases of the gallbladder, pancreas and duodenum. The gallbladder, partially opened, shows the stones located in various locations, cholecystitis, polyposis and carcinoma. Diseases of the pancreas include pancreatitis in the pancreas tail and cancer in the pancreas head. Also included is a section of the duodenum with a duodenal ulcer.

PATHOLOGICAL MODEL OF COLON AND RECTUM

6090.29

This 1/2 life size model shows various pathologies of the colon and rectum. In the descending colon region, adhesion and cancer are well represented; other pathological conditions include inflamed appendix, intussusception, Crohn disease, ulcerative colitis and adenocarcinoma. The rectum exhibits an ulcerative form of rectal cancer.

Pris:
226,- kr.

Mounted on base with stand

KIDNEY WITH ADRENAL GLAND, LIFE SIZE, 2 PARTS

6140.07

KIDNEY SECTION WITH RENAL NEPHRON AND RENAL CORPUSCLE

6140.14

This 3 models set shows the basic structure of the kidney. We can find as a first model a frontal section of the kidney, enlarged 3 times, illustrates adrenal gland, cortex, medulla, pyramids with papillae, renal pelvis and blood vessels. The second model, representing a nephron enlarged 120 times, shows a renal tubules, a collecting tube system and Henle's loop. The third one illustrates Malpighian corpuscle with the Bowman's capsule, 700 times life size.

All these models are a great instrument to understand the kidney anatomy in all the inner details.

The three models are mounted on board. Size: 70x30x11 cm - Weight: approx. 3000 g

Pris: 1.416,- kr.

6140.14

HUMAN ANATOMY MODELS

Urinary System

NEPHRON DISEASES

6140.17

This 300X life size model consists of 2 renal corpuscle sections: the first one shows the anatomy of the healthy glomerulus, the second one describes the most important glomerular pathologies due to hypertension: afferent arteriole arteriosclerosis, changes of vascular calibre, endotheliocyte and the consequent increase of plasma proteins in the urine. All the particulars are represented in high detail.

Mounted on board
Size: 20.5x15.5x6.5 cm- Weight: 110 g

Pris:
445,- kr.

6140.17

PATHOLOGICAL MODEL OF RENAL CALCULUS

6140.13

This model shows the pathology of renal calculus (kidney stones) located in the calyces of the kidney. The calculi are composed of salts or organic acids or other materials. Kidney stones of varying shapes and locations within the kidney are depicted.

Mounted on base with stand.
Size: 11x11x21.5 cm - Weight: approx. 100 g

980,- kr.

SKIN SECTION

6202.02

Pris:
1.223,- kr.

6202.02

This 70X relief model shows the main structures through 3 layers of the hairy skin: hair follicles, sebaceous and sweat glands, erector muscles, sensitive corpuscles, nerves and blood vessels are well defined.

Mounted on board. Size: 33.5x23.5x7 cm - Weight: 1000 g

6202.08

HAIRY AND HAIRLESS SKIN MODEL

Pris:
423,- kr.

6202.08

This 70X relief model compares a section of hairy skin to one without hair. All structures, including sensitive corpuscles, hair follicles, sebaceous and sweat glands, are shown in great detail.

Mounted on board. Size: 54x39x8 cm Weight: 800 g

HUMAN ANATOMY MODELS

Skin

HAIR MODEL

6000.41

This item is composed of four different models on the same base: the first one is a longitudinal section, 100X life size, of the hair root. The other three models are cross sections, greatly enlarged, of the hair shaft, hair root and hair bulb. The use of unauthentic colours makes it easy to identify all the different layers, such as external and internal root sheath, cuticle and cortex, that make up the hair.

Mounted on board.

Size: 53x38x11 cm - Weight: 950 g

Pris:
605,- kr.

6000.41

NEW

6370.08

SKIN MODEL, 35X LIFE SIZE

6370.08

This three-dimensional model shows the structure of the human skin. All the skin layers can be easily identified and the main structures, such as hair follicle, sensitive corpuscles, sebaceous and sweat glands, are numbered and referred on the accompanying k-card (included).

Pris:
346,- kr.

Mounted on base. Size: 20x15x15.5 Weight: 1250 g

NEW

6370.08

PATHOLOGICAL MODEL OF THE SKIN

6202.03

This model, approximately 30X life size, features, on the one side, detailed and realistic depictions of closed and open acne lesions, 2 primary lesions (papule and macule), 1 deeper lesion, (nodule) and an abrasion. On the other side the model shows cyst, fissure, pustule, ulcer, scale and blister. All the pathologies are showed separately in the model with a realistic representation of their morphology.

Mounted on base. Size: 16.5x13x11 cm - Weight: approx. 360 g

6202.03

Pris:
226,- kr.

HUMAN ANATOMY MODELS

Skeletal System

HUMAN DISARTICULATED SKELETON, FULL

6042.04

This life size model shows the complete human skeleton with separated bones: skull, axial skeleton, hyoid bone, ribs, sternum with rib cartilage, upper and lower limbs, sacrum and coccyx are represented in high detail. One hand and foot (left) are on wire, the other set is removed.

The skull can be disassembled into 3 parts: skullcap, base of skull and mandible.

Weight: approx. 8000 g

Pris:
1.686,- kr.

6042.04 ▶

DUST COVER

6041.00

This grey heavy-plastic cover is a fulllength protection that fits all Altay's hanging human skeleton models and those supplied on 5-caster roller stand. It can be easily opened through side buttons.

Pris:
158,- kr.

6042.06 ▼

HUMAN DISARTICULATED SKELETON, HALF

6042.06

This life size model shows a disarticulated human skeleton with one of each bone type: skull, axial skeleton, hyoid bone, ribs, intervertebral discs, sternum with rib cartilage, upper and lower limb, sacrum and coccyx are represented in high detail. The right hand and foot are on wire.

The skull can be disassembled into 3 parts: skullcap, base of skull and mandible.

Weight: approx. 4000 g

Pris:
1.378,- kr.

HUMAN ANATOMY MODELS

Skeletal System

HUMAN MUSCULAR SKELETON

6041.03

This model is a replica of a life size human skeleton and shows all the skeleton parts in high details. It's hand-assembled to provide intricate details and long-lasting durability. The main joints are articulated; the upper and lower limbs can be removed easily.

The following parts are detachable:

- Calvarium, Jaw, Legs, Skull, Arms

Pris:
2.959,- kr.

The left side of the skeleton shows the points of origin (red) and the points of insertion (blue) of the muscles.

Supplied with a 5-caster roller stand. Height: 170 cm - Weight: approx 1000 g

HUMAN MUSCULAR SKELETON, (HANGING)

6041.78

Same features as 6041.03 but with an hanging stand.

Supplied with a 5-caster hanging stand.
Height: 180 cm - Weight: approx. 1000 g

Pris:
3.331,- kr.

MINI SKELETON

6041.84

This 1/2 life size model shows the anatomy of the human skeleton in high detail. The skull can be disassembled into 3 parts: skullcap, base of skull and mandible. All the main joints are articulated. Arms and legs can be removed easily.

Mounted on a stand for hanging
Height: 25x25x95 cm
Weight: 1500 g

Pris:
939,- kr.

6041.03 ▶

Skeletal System

HUMAN SKELETON

6041.02

This model is a replica of a life size human skeleton and shows all the skeleton parts in high details.

It's hand-assembled to provide intricate details and long-lasting durability. The main joints are articulated; the upper and lower limbs can be removed easily.

The following parts are detachable:

- Calvarium, Jaw, Legs, Skull, Arms

Pris:
1.552,- kr.

Supplied with a 5-caster roller stand.

Height: 170 cm - Weight: approx. 1000 g

HUMAN SKELETON, (HANGING)

6041.77

Same features as 6041.02 but with an hanging stand.

Supplied with a 5-caster hanging stand.

Height: 180 cm - Weight: approx. 1000 g

Pris:
2.130,- kr.

◀ 6042.28

◀ 6041.02

MINI SKELETON WITH JOINTS

6042.28

This ½ life-size model shows the anatomy of the human skeleton in great detail. The skull can be disassembled into 3 parts: skullcap, base of skull and mandible. The right side shows all the main joints: shoulder, elbow, hip and knee. The left arm and leg can be removed easily.

Mounted on stand for hanging.

Size: 25x25x95 cm Weight: 1600 g

Pris:
811,- kr.

HUMAN ANATOMY MODELS

Skeletal System

FLEXIBLE VERTEBRAL COLUMN WITH FEMUR HEADS

6041.07

A fully flexible life size vertebral column consisting of the occipital plate, cervical, thoracic and lumbar vertebrae, sacrum, coccyx, complete pelvis with symphysis, removable femur heads. The model also features representations of the vertebral arteries, spinal nerve branches and a prolapsed L3-L4 intervertebral disc.

Mounted on a stand for hanging
Size: 24.5x18x89 cm - Weight: approx. 3000 g

Pris:
697,- kr.

FLEXIBLE VERTEBRAL COLUMN WITH FEMUR HEADS AND MUSCLE INSERTIONS

6041.08

A fully flexible life size vertebral column including the occipital plate, cervical, thoracic and lumbar vertebrae, sacrum, coccyx, complete pelvis with symphysis, removable femur heads. The model also features representations of the vertebral arteries, spinal nerve branches and prolapsed L3-L4 intervertebral disc. The left side of the skeleton shows the points of origin (red) and the points of insertion (blue) of the muscles.

Mounted on a stand for hanging Size: 24.5x18x90 cm - Weight: approx. 3000 g

Pris:
810,- kr.

FLEXIBLE VERTEBRAL COLUMN

6041.06

A fully flexible life size vertebral column consisting of the occipital plate, cervical, thoracic and lumbar vertebrae, sacrum, coccyx and complete pelvis. Features include representations of the vertebral arteries, spinal nerve branches and a prolapsed L3-L4 intervertebral disc.

Mounted on a stand for hanging
Size: 24.5x18x80 cm
Weight: approx. 3000 g

Pris:
612,- kr.

FLEXIBLE VERTEBRAL COLUMN WITH REMOVABLE SACRAL CREST

6041.09

A fully flexible life size vertebral column consisting of the occipital plate, cervical, thoracic and lumbar vertebrae, sacrum, coccyx and complete pelvis. Features include representations of the vertebral arteries, spinal nerve branches and a prolapsed L3-L4 intervertebral disc. The sacral crest and the coccyx are removable to show the sacral portion of the spinal cord.

Mounted on a stand for hanging - Size: 24.5x18x80 cm - Weight: approx. 3000 g

Pris:
810,- kr.

HUMAN ANATOMY MODELS

Skeletal System

FLEXIBLE VERTEBRAL COLUMN WITH FEMUR HEADS, MUSCLE INSERTIONS, REMOVABLE SACRAL CREST

6041.90

A fully flexible life size vertebral column including the occipital plate, cervical, thoracic and lumbar vertebrae, sacrum, coccyx, complete pelvis with symphysis, and removable femur heads. The model also features representations of the vertebral arteries, spinal nerve branches and prolapsed L3-L4 intervertebral disc. The left side of the skeleton shows the points of origin (red) and the points of insertion (blue) of the muscles. The sacral crest and coccyx are removable to show the sacral section of the spinal cord and associated nerve branches.

Mounted on a stand for hanging. Size: 24.5X18X89 cm - Weight: approx. 4000 g

Pris:
887,- kr.

FLEXIBLE VERTEBRAL COLUMN WITH OPEN SACRUM AND FEMUR HEADS

6041.10

A fully flexible life size vertebral column consisting of the occipital plate, cervical, thoracic and lumbar vertebrae, sacrum, coccyx, complete pelvis with articulated, removable femur heads.

Additional features include representations of the vertebral arteries, spinal nerve branches, and a prolapsed L3-L4 intervertebral disc. The sacral crest and coccyx are removable to show the sacral section of the spinal cord and associated nerve branches.

Mounted on a stand for hanging. Size: 24.5X18X90 cm - Weight: approx. 3000 g

Pris:
982,- kr.

FLEXIBLE SPINAL COLUMN WITH COLOUR CODED REGIONS

6041.95

A fully flexible life size vertebral column including the occipital plate, cervical, thoracic and lumbar vertebrae, sacrum, coccyx and complete pelvis. Included are the vertebral arteries, spinal nerves and a prolapsed L3-L4 intervertebral disc. The various regions of the spinal column are color coded for ease of identification.

Mounted on a stand for hanging. Size: 24.5X18X80 cm - Weight: approx. 970 g

Pris:
878,- kr.

SKELETON OF HUMAN TRUNK

6041.83

A fully flexible life size plastic human trunk skeleton consisting of the following features: complete pelvis including the ischium, ilium and pubis, sacrum, coccyx and the symphysis, complete spinal column with ribs and sternum associated structures, occipital plate, clavicle and scapula.

Mounted on a stand for hanging. Size: 24.5X18X80 cm - Weight: approx. 4000 g

Pris:
820,- kr.

A complete life size skeleton of a female human pelvis consisting of the pelvic bones (ischium, ilium and pubis), sacrum, coccyx and the symphysis.

Size: 24.5x18x21.5 cm - Weight: approx. 1100 g

6041.12 ▼

6041.13 ▼

MODEL OF PELVIS WITH 4TH AND 5TH LUMBAR VERTEBRAE WITH FEMUR HEADS

6041.92

This life size model consists of the pelvic bones with femur heads, sacrum, coccyx and fourth and fifth lumbar vertebrae with intervertebral discs.

Size: 26x18x27 cm - Weight: approx. 1770 g

Pris:
298,- kr.

MALE SKELETAL PELVIS

6041.13

A complete life size plastic skeleton of a human male pelvis consisting of the pelvic bones (ischium, ilium and pubis), sacrum, coccyx and symphysis.

Size: 24.5x18x21.5 cm - Weight: approx. 1100 g

Pris:
227,- kr.

HUMAN ANATOMY MODELS

Skeletal System

BONES OF THE FOOT

6041.40

A life size skeleton of the human foot with articulated joints. Natural movements of the foot can be demonstrated easily and effectively.

Size: 20x13x12cm - Weight: approx. 330 g

Pris:
260,- kr.

6041.40 ▲

HAND BONES

6041.20

A life size plastic skeleton of the human hand with articulated joints.

Size: 12x11x31 cm - Weight: approx. 110 g

Pris:
233,- kr.

6041.20 ▼

SACRUM WITH COCCYX

6041.14

A life size model of the sacral vertebrae with the coccyx.

Size: 12x12x12 cm
Weight: approx. 300 g

Pris:
108,- kr.

◀ 6041.14

COLOURED SKULL, 3 PARTS

6042.29

This life size model is a detailed reproduction of the human skull. The skullcap is removable to show internal details; the mandible is articulated and removable. All the joints, sutures, fissures, foramina and processes are portrayed with utmost accuracy.

All the bones are depicted in different colours, making this model a useful tool to study the correct position and the relationship of all the structures.

Size: 19.5x17x21.5 cm - Weight: approx 950 g

Pris:
1.246,- kr.

6042.29 ▲

HUMAN MUSCULAR SKULL, 3 PARTS

6041.55

This life-size model reproduces the human skull in great detail. All the most important anatomical structures are numbered; the left side of the skull shows the points of origin (red) and the points of insertion (blue) of the muscles. It can be disassembled into three parts: skullcap, base of skull and mandible.

Size: 18x17x21 cm
Weight: 875 g

Pris:
518,- kr.

6041.55 ▲

MINI SKULL

6041.97

This model, 1/2 adult natural size, depicts all structural details of the human skull: it can be disassembled into 3 parts: skullcap, base of skull and mandible.

Size: 11x11x16.5 cm
Weight: 150 g

Pris:
107,- kr.

HUMAN ANATOMY MODELS

Skeletal System

Pris:
349,- kr.

KNEE JOINTS SET

6042.01

This 1/2 life size model compares the normal knee joint with 3 different stages of ischemic pathology, from the osteoporosis and atrophy to the joint degeneration arthritis.

Mounted on base
Size: 16.5x13x14.5 cm - Weight: 380 g

6042.27

Pris:
505,- kr.

MINIATURE JOINTS

6042.27

This set model is composed of 4 pieces showing the most important joints of the human body: hip, elbow, shoulder and knee joint are well represented. Each piece is 1/2 life size.

Mounted on base
Size (each model): 12x12x15 cm - Weight (each model): approx 150 g

ATLAS, AXIS AND OCCIPITAL BONE

6041.52

A detailed, life size reproduction of the atlas and axis vertebrae, including the occipital bone. The model shows the pivoting action of the head and the articulation with the skull.

Mounted on base with stand.
Size: 12x12x20 cm
Weight: approx. 200 g

Pris:
149,- kr.

HYOID BONE

6041.56

This life model shows the human hyoid bone.

Mounted on base with stand.
Size: 7x6x8.5 cm
Weight: 40 g

Pris:
313,- kr.

6041.56

SHOULDER JOINT

6041.30

This life size model shows the shoulder joint with ligaments.

Mounted on base with stand.
Size: 20x15x25 cm - Weight: approx. 560 g

Pris:
315,- kr.

6041.30

KNEE JOINT

Pris:
285,- kr.

6041.81

This life size model represents a functional model of knee joint with lateral ligaments, meniscus and patellar ligament.

Mounted on base.
Size: 12x12x32 cm
Weight: approx. 440 g

6041.81

ELBOW JOINT

Pris:
392,- kr.

6042.30

This single-piece life-size model is a realistic representation of the human elbow with ligaments.

6042.30

Mounted on base.
Size: 13x13x23 cm
Weight: 80 g

HIP JOINT

6042.03

This single-piece life-size model illustrates the right hip joint with ligaments

Mounted on base.
Size: 20x15x25.5 cm
Weight: 350 g

Pris:
392,- kr.

HUMAN ANATOMY MODELS

Skeletal System

THORACIC SPINAL COLUMN

6041.86

This life size model shows the thoracic spinal column. It consists of 12 thoracic vertebrae with intervertebral discs, thoracic nerves and spinal cord.

Mounted on base with stand.
Size: 11x11x 34 cm
Weight: approx. 600 g

Pris:
207,- kr.

◀ 6041.86

LUMBAR SPINAL COLUMN WITH SACRAL AND COCCYX BONES

6041.87

This life size model consists of 5 lumbar vertebrae with intervertebral discs, lumbar nerves and spinal cord. The sacral crest and coccyx are removable to show the sacral segment of the spinal cord and associated nerve branches.

Mounted on base with stand.
Size: 11x11x37 cm
Weight: approx. 800 g

Pris:
227,- kr.

◀ 6041.87

3 LUMBAR VERTEBRAE WITH HERNIA AND PROLAPSED INTERVERTEBRAL DISC

6042.34

This life size model shows 3 lumbar vertebrae with spinal nerves, dura mater and 2 intervertebral discs affected by lateral and medial hernia. You can see in high detail the 2 pathological intervertebral discs with the correct position of the 2 types of hernia.

Mounted on base with stand
Size: 17.5X14X18 cm
Weight: approx. 400 g

Pris:
226,- kr.

6042.34 ▶

2 LUMBAR VERTEBRAE WITH HERNIA AND PROLAPSED INTERVERTEBRAL DISC

6042.35

This life size model shows 2 lumbar vertebrae with spinal nerves, dura mater and an intervertebral disc affected by medial hernia. On the base you can see in high detail 2 pathological intervertebral discs with the correct position of medial and lateral hernia.

Mounted on base with stand
Size: 17.5x14x18 cm - Weight: approx. 280 g

Pris:
206,- kr.

6042.35 ▶

CERVICAL SPINAL COLUMN

Pris:
207,- kr.

6041.85

This life size model of the cervical spinal column consists of 7 cervical vertebrae with intervertebral discs, occipital plate, cervical nerves, vertebral arteries, spinal cord and brain stem.

Mounted on base with stand.
Size: 16x11x22 cm
Weight: approx. 350 g

◀ 6041.85

ADVANCED OSTEOPOROSIS MODEL

6041.80

This life size model shows three vertebrae: one healthy vertebra, one vertebra with pathological changes at first stage, one vertebra with pathological changes at advance stage.

Mounted on base with stand.
Size: 11x11x15 cm
Weight: approx. 220 g

6041.80 ▶

Pris:
215,- kr.

HUMAN ANATOMY MODELS

Teeth

DECIDUOUS TEETH MODEL

6041.54

This life size model shows the upper and lower jaw of a 5 year old child. The lower jaw is movable to reproduce the natural chew. The model exposes the arrangement of the young teeth.

Mounted on base with stand.
Size: 12x12x21 cm
Weight: approx. 85 g

Pris:
503,- kr.

6041.71 ▶

DENTAL PATHOLOGY MODEL

6041.71

This 4X life size model shows the process of dental caries in its progressive stages. The tissues forming the tooth (enamel, dentine and pulp) are shown, along with the way in which they are affected by the caries process.

Pris:
146,- kr.

Size: 6x4.5x11 cm - Weight: approx. 100 g

LOWER JAW, 6 PARTS

6041.60

This 3X life size model is divisible into 6 parts to show all the characteristics of an adult half mandible. A portion of the jaw can be removed to show the roots of the teeth and the internal structure of the bone. Canine and molar teeth can be removed and dissected longitudinally to observe the tooth roots, pulp and nerves.

Pris:
1.143,- kr.

6041.60 ▶

Mounted on base with stand.
Size: 35x18x35.5 cm
Weight: approx. 1130 g

PERMANENT TEETH MODEL

6041.53

This life size model shows the upper and lower jaw of an adult. The lower jaw is movable to reproduce the natural chew. The model exposes the complete set of permanent teeth with roots and nerves fibres.

Mounted on base with stand.
Size: 12x12x21 cm
Weight: approx. 170 g

Pris:
642,- kr.

HUMAN ANATOMY MODELS

Teeth

LOWER MOLAR WITH CARIES

6041.94

This 1-piece model is approximately 10X life size; it shows the most important dental pathologies, including dental caries, pulpitis, gingivitis and periapical periodontitis.

Mounted on base with stand.
Size: 11x11x20 cm -
Weight: approx. 250 g

Pris:
249,- kr.

DECIDUOUS TEETH

6042.33

This 10-piece model is a useful tool to study the morphology of primary tooth types (incisors, canines and molars). Enlarged to 10X life-size.

Mounted on base. Size: 53x38x15 - Weight: 1400 g

6042.33

Pris:
735,- kr.

NEW

PERMANENT TEETH

6042.32

This set model, composed of 16 pieces, shows in great detail the morphology of the permanent teeth.

Maxillary and mandibular tooth types (incisors, canines, premolars and molars) are represented, enlarged to 4X life size.

6042.32

Pris:
194,- kr.

Max Size: 5x5x14,5 cm
Weight: 200 g

HUMAN ANATOMY MODELS

Teeth

DENTAL CARIES MODEL

6041.70

This model, composed of 7 parts, is 4X life size. It consists of 3 teeth, seated in their sockets, that shows the progressive deterioration of tooth structure by dental caries. The first tooth shows the caries in the enamel. In the second tooth, the caries invades the dentine. In the third tooth, the pathology affects the pulp, jeopardizing the vitality of the tooth.

Size: 12x6.5x8 cm - Weight: approx. 300 g

Pris:
249,- kr.

INCISOR, CANINE AND MOLAR

Pris:
884,- kr.

6041.82

5-part model includes representations (10X life size) of human incisor, canine and molar teeth. The canine and molar can be divided into 2 parts each, showing internal features (dentine, enamel, cement and pulp)

Overall Size: 33x20.5x14.5 cm - Weight: approx. 700 g

ORAL HYGIENE MODEL

6041.05

A3x life size model that is useful for teaching the correct way to brush teeth. A giant toothbrush is included.

Pris:
494,- kr.

Mounted on base.

Size: 23x20x16 cm - Weight: approx. 1000 g

DENTAL HYGIENE MODEL

6041.93

This life size model shows the upper and lower dentition of an adult human. Valuable aid for teaching proper oral hygiene procedures.

Size: 8x8x7 cm - Weight: approx. 226 g

Pris:
251,- kr.

HUMAN ANATOMY MODELS

Extremities

ANATOMY OF THE HAND, 3 PARTS

6000.37

This 3-part model, enlarged 2X life size, shows the anatomy of the hand, including muscles, nerves, ligaments, vessels and bone structures. Aponeurosis is removable for closer examination.

Pris:
1.287,- kr.

◀ 6000.37

Size: 28x8x40 cm
Weight: approx. 965 g

REGIONAL ANATOMY OF THE HAND, 7 PARTS

6000.38

This life-size model shows the anatomy of the hand with great accuracy and detail; the superficial layers can be removed at different levels to expose the inner structures. Muscles, blood vessels, nerves, tendons, ligaments and bones are well represented.

Size: 13x11x33 cm - Weight: 330 g

Pris:
1.566,- kr.

◀ 6000.38

MUSCLES OF HAND, 4 PARTS

6000.08

This life size model is composed of 4 parts. The palmar aponeurosis and the palmaris brevis can be removed to reveal the underlying network of muscles, tendons, vessels and nerves. A deeper palmar dissection allows observation of the palmaris longus tendon, the palmar carpal ligament and the median nerve. Part of the thenar muscles can be removed to expose the superficial palmar branch of the radial artery. A superficial dorsal dissection shows ligaments, nerves and vessels.

Mounted on base with stand. Size: 15x11x30 cm - Weight: approx. 350 g

Pris:
2.001,- kr.

6000.10 ▶

NORMAL AND ABNORMAL FEET, SET OF 3

6000.10

3 life size models representing normal, flat and arched feet.

Size: 21x14.5x31.5 cm (each model)
Weight: approx. 1350 g

Pris:
587,- kr.

6000.09

REGIONAL ANATOMY OF THE FOOT

6000.09

This life size model is composed of 3 parts. The plantar aponeurosis and the flexor brevis can be removed to show the underlying network of muscles, tendons, vessels and nerves. A deeper plantar dissection allows observation of the plantar muscles and plantar nerve branches. A superficial dorsal dissection shows ligaments, nerves and vessels.

Size: 23x8x12 cm
Weight: approx. 650 g

Pris:
883,- kr.

6000.09

SECTION OF FOOT

6000.11

This life size model shows a human foot sectioned along the sagittal plane.

Size: 23x8x12 cm
Weight: approx. 450 g

6000.11 ▶

Pris:
224,- kr.

MUSCLES OF FOOT

6000.12

This life size model represents a superficial dissection of the foot with the primary muscles and ligaments.

Size: 23x8x12 cm
Weight: approx. 420 g

Pris:
228,- kr.

HUMAN ANATOMY MODELS

Training Model • Acupuncture

ACUPUNCTURE MODEL

6000.46

This male model provides a highly accurate illustration all of the acupuncture pressure points and meridians. All points are numbered and identified on the accompanying k-card. Ideal for teaching as well as clinical practice. 1/3 life size.

Mounted on base. Size: 20x15x53 cm - Weight: 700 g

NG & TRACHEOSTOMY TEACHING TORSO

6330.10

The N(aso) G(astric) & Tracheostomy Teaching Torso is a 3-dimensional, 2-sided hand-painted torso. One side, covered with a transparent lid, shows the sagittal section including the nose, mouth, pharynx, trachea, esophagus, lungs and stomach. The other side depicts the anatomically correct view of a human torso for teaching the proper method of measuring the NG tube's length. Torso also features a tracheostomy to demonstrate a variety of care techniques.

For realistic practice of the following procedures:

- NG tube insertion, irrigation, monitoring and removal
- Gastric lavage and gavage
- Tracheostomy care and suctioning

Size: 33x23x73 cm
Weight: approx. 4400 g

NEW

Pris:
3.296,- kr.

HUMAN ANATOMY MODELS

Pathology Models

Altay's pathology models

represent an excellent basic educational tool for understanding some of the most common pathologies of the human body. They also represent an useful resource for the surgery in the medical field. Altay's Pathology models are also designed to be customized. Use it to promote your client's brand. Contact us for more information.

This section is dedicated to a wide range of biology models, including virology, botany and zoology.

General biology is a new expanding field which we are constantly increasing through the design and development of new items.

Through the study of real specimens, our models reproduce (with excellent detail) all the features of general biology, giving particular attention to accuracy and quality.

Our models represent an excellent support for the students in the study of the general biology.

All models are numbered and are accompanied by a handy key card, making a handy and quick reference guide.

GENERAL BIOLOGY MODELS

- 76** Viruses and Bacteria
- 77** Coelenterates
- 77** Botany
- 81** Cell and Cellular Division
- 83** Zoology

PRODUCTS HIGHLIGHT

84 FROG

This 3X life size model provides a highly accurate illustration of the morphology of a frog.

84 HEN

This 8-part life-size model describes in great detail the anatomy of a hen.

78 HERMAPHRODITE DICOT FLOWER

This model describes with great accuracy and detail the anatomy of a typical hermaphrodite dicotyledonous flower.

81 DOUBLE HELIX DNA

This self assembly kit contains all the blocks needed to build a 24 base pairs right handed double helix DNA (B-DNA).

BIOLOGY MODEL

Viruses and Bacteria

VARIOUS TYPES OF VIRUSES, SET OF 4

Pris:
1.206,- kr. 6233.01

This set is composed of models 6233.02, 6233.03, 6233.04 and 6233.05

Weight: 960 g

TOBACCO MOSAIC VIRUS

Pris:
322,- kr. 6233.02

This model, enlarged millions of times, shows the capsid structure of the tobacco mosaic virus, including the viral genome (RNA). Mounted on board. Size: 20x15x9 cm - Weight: approx. 80 g

◀ 6233.02

Pris:
316,- kr. 6233.05

HIV VIRUS (VIRUS RESPONSIBLE FOR AIDS)

6233.05

This model, enlarged millions of times, shows the structure of the HIV retrovirus, including the outer lipid membrane with protein structures and the internal nucleus containing the viral genome (RNA).

Mounted on board.

Size: 20x15x9 cm - Weight: approx. 80 g

ADENOVIRUS

Pris:
322,- kr. 6233.03

This model shows the capsid structure of the adenovirus, enlarged millions of times.

Mounted on board. Size: 20x15x9 cm - Weight: approx. 90 g

◀ 6233.03

BACTERIUM

Pris:
322,- kr. 6231.03

A complete tool for understanding the structure of the prokaryotic cell. This item, greatly enlarged, is composed of four models on the same base:

- A cross-section of a general prokaryotic cell, illustrating typical structures as pili, flagella, inclusion body, plasmides and chromosome
- Two schematic representations of the cell wall of Gram-negative and Gram-positive bacteria
- A model of spore, partially cut away to show all its different layers, from the exosporium to the cytoplasmic membrane.

All the main structures, shown in minute detail, are numbered and referenced on the included k-card.

BACTERIOPHAGE T4

Pris:
322,- kr. 6233.04

The structure of bacteriophage T4, a virus that attaches to the surface of the much larger bacterium *Escherichia coli*, is shown millions of times enlarged life size.

◀ 6233.04

NEW

Size: 55x38x15 cm - Weight: 350 g

Mounted on board. Size: 20x15x9 cm - Weight: approx. 90 g

BIOLOGY MODEL

Coelenterates • Botany

HYDRA MODEL, 4 PARTS

6280.12

This 4-part model shows longitudinal and cross sectional views of the hydra, highlighting significant anatomical features, including the ectoderm, mesoglea, coelenteron, male and female egg cells, buds and mouth opening. The cross sectional block model, about 250X life size, shows various cellular structures, including nematoblasts, epithelial cells, sensory cells, interstitial cells and the nerve network. An additional block model shows the anatomy of a highly enlarged cnidoblast cell. Mounted on base. Size: 70x30x58 cm - Weight: approx. 2200 g

PLANT CELL

Pris: 553,- kr.

6231.01

This model, enlarged 20000 times, shows the significant structures of a plant cell, including the cell wall, nucleus, vacuole, Golgi apparatus, mitochondrion, chloroplast, chromoplast, leucoplast, endoplasmic reticulum.

CORN SEED MODEL, 2 PARTS

6300.15

This model is 40X life size; it shows the corn seed in longitudinal section with excellent details of the seed coat and endosperm. The seed embryo can be removed for closer examination of its internal features.

Mounted on base.
Size: 40x26x21.5 cm
Weight: approx. 1500g

Mounted on board. Size: 42x17x10 cm - Weight: approx. 1300 g

BIOLOGY MODEL

Botany

HERMAPHRODITE DICOT FLOWER

This three-piece model, enlarged to 14X life size, describes with great accuracy and detail the anatomy of a typical hermaphrodite dicotyledonous flower. Thanks to the cross-section, the anatomy of the internal structures, such as stamens, stigma, style and ovary with eggs can be easily studied. External structures, including petals and sepals, are also well represented. The main structures are numbered and referenced on the accompanying k-card.

Mounted on base with stand. Size: 33x23x40 cm - Weight: 515 g 6310.06 ▶

6310.06

Pris:
3.293,- kr.

NEW

MONOCOT ROOT (ZEA MAYS)

6310.08

This 200X life-size model shows the structure of a typical monocot root in a cross and longitudinal section. This model is divided into 3 segments, including the following: zone of primary structure, zone of distention cells and meristematic zone. All the different structures and cellular types are numbered and identified on the accompanying k-card.

◀ 6310.08

Pris:
1.790,- kr.

Mounted on base.
Size: 33x23x54 cm - Weight: 2800 g

DICOT LEAF

6310.09

The structure of a dicot leaf is well represented in this 600X life-size model; the cross and the longitudinal section describes all the main structures and the different cellular types through the upper page, mesophyll and lower page.

Mounted on base.
Size: 33x23x36 cm
Weight: 3500 g

6310.09 ▶

Pris:
991,- kr.

CHLOROPLAST

6310.11

This model represents an important tool to study one of the most important organelles of the plant cell. The chloroplast, greatly enlarged, is cross and longitudinally sectioned to show in great detail the internal microscopical structure such as inner and outer membrane, granum, stroma, starch granules and osmiophile globule.

Mounted on base.
Size: 40x26x20 cm
Weight: 2530 g

Pris:
1.109,- kr.

◀ 6310.11

BIOLOGY MODEL

Botany

DICOT ROOT SECTION (*LEGUMINOSEAE*)

6310.07

This 3-part model, enlarged 400X life size, shows the structure of a dicot root in a cross and longitudinal section. All significant structures are well represented in great detail.

The model is divided in 3 segments including the following: the first part describes the root tip with cap, the second one illustrates the distension zone and the last one part shows the meristematic mature region.

Mounted on base.

Size: 33x23x 54 cm - Weight: approx. 3850 g

◀ 6310.03

Pris:
1.790,- kr.

GYMNOSPERM STEM (*PINUS SILVESTRIS*)

Pris:
1.578,- kr.

6310.03

This 350X life size model shows in great detail the section of a pinus silvestris 3- year old stem. It describes all basic structures of the gymnosperm stem, including epidermis and vascular cylinder.

Mounted on base.

Size: 30x38x9.5cm - Weight: approx. 1600 g

MONOCOT STEM SECTION (*ZEA MAYS*)

6310.04

This model, enlarged 400X life size, shows a cross and longitudinal section through a monocot stem.

Epidermis, cortex, central vascular cylinder and all the significant internal structures are well represented.

Mounted on base.

Size: 33x23x7.5 cm

Weight: approx. 1000 g

◀ 6310.04

Pris:
1.367,- kr.

◀ 6310.07

DICOT ARBOREOUS STEM SECTION (*TILIA*)

6310.01

This model, enlarged 300X life size, shows the structure of a dicot wooden stem. Longitudinally and cross sectioned, it shows significant elements of the cortex and central vascular cylinder. All different structures are displayed in different color.

6310.01 ▶

Pris:
1.445,- kr.

Size: 42x30x11.5 cm
Weight: approx. 1600 g

MONOCOT LEAF SECTION (*ZEA MAYS*)

This model, enlarged 500X life size, shows the cross and longitudinal section of a monocot leaf. Significant structures include dorsal and ventral page, xylem, phloem and mesophyll.

Pris:
925,- kr.

DICOT HERBACEOUS STEM SECTION (*HELIANTUS ANNUUS*)

6310.02

This model, enlarged 300X life size, illustrates a dicot vascular structure. Longitudinally and cross sectioned, it shows clearly significant elements of the tegumental and cortical zone. The central vascular cylinder, including phloem and xylem, is represented in great detail. All different structures are displayed in different color.

Size: 42x30x11.5 cm - Weight: approx. 1600 g

Pris:
1.410,- kr.

Cell and Cellular Division

NEW

Pris:
1.497,- kr.

ANIMAL CELL

6231.02

This single-piece model, magnified approximately 13,000 times, is a very useful tool to study the cytology of an eukaryotic cell. The typical structures, such as microvilli, flagellum, mitochondria, nucleus, rough and smooth ER, are reproduced with great detail and accuracy. The model comes with an accompanying multilingual k-card identifying 24 structures.

Mounted on base.
Size: 55x38x15 cm
Weight: 2050 g

6231.02 ▲

CHROMOSOME MODEL

6250.10

This single-piece model, 10000X enlarged, shows the structure of a human chromosome. All the main parts - centromere, telomere and loops - are extremely accurately reproduced.

Mounted on base with stand.
Size: 15x15x37 cm
Weight: 520 g

Pris:
361,- kr.

6250.10 ►

DOUBLE HELIX DNA 12 BP MODEL (1 TURN)

Pris:
208,- kr.

6250.11

This self assembly kit contains all the blocks needed (stand included) to build a 12 base pairs right handed double helix DNA (B-DNA). Parts are colour coded and have characteristic shapes, with deoxyribose being pentagonal, phosphates cylindrical and nitrogenous bases showing their peculiar pyrimidine or purine structure. Two different central connecting parts depict the 2 and 3 H-bond between Thymine/Adenine and Cytosine/Guanine. The assembled model is important in demonstrating the most peculiar features of double stranded DNA structure and topology.

Size: 30x22x10 cm

DOUBLE HELIX DNA 24 BP MODEL (2 TURNS)

6250.12

Same features as 6250.11 but with the blocks needed to build a 24 base pairs right handed double helix DNA (B-DNA).

Size: 30x22x10 cm

Pris:
361,- kr.

CELL MEIOSIS MODEL

6232.03

Pris:
1.710,- kr.

This item is composed of 12 different pieces showing the main stages of the mammal cell meiosis (prophase I, metaphase I, anaphase I, telophase I, cytokinesis I, prophase II, metaphase II, anaphase II, telophase II and cytokinesis II) at an enlargement of approx. 10000 times. During all stages you can see the different characteristics of the cellular structures such as

chromosomes, centrioles, spindle and nucleus. Every single piece is numbered to indicate the correct sequence of steps.

Mounted on bases. Size (each piece): 41x32x21 cm
Weight (each piece): approx. 2400 g

▲
6232.03

CELL MITOSIS MODEL

6232.02

This item is composed of 9 different pieces showing the main stages of the mammal cell mitosis (prophase, metaphase, anaphase and telophase) at an enlargement of approx. 10000 times. During all stages you can observe the different characteristics of the cellular structures such as chromosomes, centrioles, spindle and nucleus. Every single piece is numbered to indicate the correct sequence of steps

Mounted on bases
Size (each piece): 33.5x23.5x29 cm
Weight (each piece): 2050 g

◀ 6232.02

Pris:
1.528,- kr.

BIOLOGY MODEL

Zoology

PARAMECIUM MODEL

Pris:
703,- kr. 6280.14

This model, greatly enlarged, shows in two pieces the morphology of a Paramecium. The longitudinal section reveals the inner organules such as: food and contractile vacuoles, lysosome, macro and micronucleus. All structures are reproduced in great detail and identified on the accompanying k-card.

Mounted on base.
Size: 40x26x16 cm
Weight: 1660 g

6280.14 ▶

AMPHIOXUS

6280.55

This three-part model, enlarged to 10X life-size, shows the morphology of an Ampioxus. The inner anatomy can be easily studied thanks to the longitudinal section; all the main structures, such as cerebral vesicle, neural tube, nephridium, gonad and circulatory system, are numbered and referenced on the accompanying multilingual k-card (included).

Mounted on base. Size: 43x30x18 cm - Weight: 800g

◀ 6280.55

Pris:
427,- kr.

NEW

COMPARATIVE TAPEWORM MODEL

6280.56

This model compares the structures of *Taenia saginata* and *Taenia solium* scolex; the anatomy of the proglottid is shown through the longitudinal section at three different stages of maturation: immature, mature and gravid proglottid. Significant structures, such as suckers, hooklets, uterus and testis, are numbered and referenced on the accompanying k-card.

Mounted on board.
Size: 53x38x9.5 cm - Weight: 750 g

Pris:
648,- kr.

6280.56 ▼

RAT DISSECTION MODEL

6280.50

This 6-part life-size model is an important tool to study zoology, providing a realistic reproduction the anatomy of the rat. The ventral dissection exposes heart and lungs, liver, intestine, male and female genital systems. The internal organs are removable for closer examination.

Mounted on board.
Size: 25x18x7 cm
Weight: 250 g

Pris:
712,- kr.

6280.50 ▲

BIOLOGY MODEL

Zoology

FROG

Pris:
403,- kr.

6280.53

This 3X life size model provides a highly accurate illustration of the morphology of a frog. The ventral part is open for a closer study of the inner anatomy.

Removable components include the following:

- heart and lungs
- liver
- stomach
- intestine.

On the accompanying multilingual k-card more than 15 structures are identified

Mounted on base with stand.
Size: 23x15x37 cm - Weight: 400 g

HEN

This 8-part life-size model describes in great detail the anatomy of a hen. The right side shows the external morphology while the right part, longitudinally sectioned, reveal the inner structures such as: muscles, heart, liver, intestine, stomach, lungs, reproductive system and an egg. The model comes with an accompanying multilingual k-card identifying 39 structures.

NEW

Pris:
888,- kr.

6280.54

Mounted on base with stand.
Size: 40x26x47.5 cm
Weight: 2400 g

6280.53

FISH MODEL

Pris:
600,- kr.

6280.51

This 5-part life-size model shows the anatomy of a typical bony fish. The right side shows the external structures such as fin, eye and nostrils; the left side is longitudinally sectioned to reveal the internal characteristics.

Removable pieces include the following:

- half head
- branchial arch
- liver with intestine
- gas bladder

Mounted on base with stand.
Size: 40x26x24.5 cm - Weight: 1500 g

Altay's anatomical charts are developed and kept to provide the most accurate depiction of the human anatomy.
With Altay's Charts you never have to refer to a separate key card or manual.
Each chart is available and printed on heavy-duty paper with or without lamination.
Each chart comes in a rigid tube.

NOTES

ALTAY MOBILE LAB[®]

Mobile Science Laboratory

All you need for PHYSICS, CHEMISTRY and BIOLOGY EXPERIMENTS in a Compact and Mobile Cart

This is a stand alone system designed for 11-15 years old students.

The cart is completely mobile and has 5 storage drawers, protecting your equipment in shock-free, moulded sponge pods.

Do all of your science experiments on the acid resistant work surface.

The Altay Mobile Science Laboratory is designed for easy access to water, gas and electricity.

It is ideal for all teaching environments and its modular design guarantees flexibility and adaptability for all of your science experiments.

**TO LEARN MORE, PLEASE VISIT
WWW.ALTAYSCIENTIFIC.COM**

 **ALTAY[®]**
SCIENTIFIC
Crafted for your world.

Do you now that while buying Altay's products you are selecting:

► **HIGH QUALITY**

Altay's anatomical models are made durable polyvinyl resin and hands painted by skilled craftsmen. This ensures durability as well as natural look.

► **SCIENTIFIC PERFECTION**

► **THREE YEAR GUARANTEE ON ALL ALTAY PRODUCTS**

► **100% SATISFACTION GUARANTEED**

you may return the products within 15 days for replacement

► **BEST VALUE**

Altay offers the best quality for the price available anywhere

► **PROMPT DELIVERY**

Most of our products are shipped from Italian stock

► **ENVIRONMENTAL FRIENDLY PRODUCTS**

Critical to our success are the many professional relationships that we maintain with teachers and professors at important educational institutions such as The University of Bologna, Bologna/Italy, Athlone Institute of Technology, Athlone/Ireland and Trinity College, Dublin/Ireland.
